Albright College
Summer Sessions
2015

ADMISSION

Albright College Summer Session courses are open to current Albright students, students enrolled at other colleges, adult students from the community, and qualified high school students.

REGISTRATION

Current Albright students should register online through Self Service beginning Monday, April 27, 2015.

Non-Albright students should complete the enclosed Registration Form. You may register in person at the Registrar’s Office in Selwyn Hall South from 8 am to 5 pm, Monday through Friday. Registration can also be done by telephone at (610) 921-7256, by fax at (610) 921-7258, by email at transcripts@albright.edu or by mail at:

ALBRIGHT COLLEGE RESERVES THE RIGHT TO CANCEL A COURSE IF THERE IS INSUFFICIENT ENROLLMENT.

TUITION

Per course: $1760 per course
Albright Student: $1660 per course
High School Students: $880 per course

You will be billed for your Summer Sessions tuition. Payment is due by Tuesday, May 26 for the First Session and the Online Session and by Monday, June 29 for the Second Session. If you register after these dates, payment will be due at time of registration.

If payment is not received in full by the due date, your course registration will be cancelled.

WITHDRAWAL AND REFUND POLICY

Once registered, a student may officially withdraw from a course by notifying the Registrar’s Office in writing. Discontinuing class attendance or notifying the instructor is not considered an official withdrawal. A student who does not officially withdraw from a course will receive a grade of “F”.

Following official withdrawal from a course, tuition refunds will be made as follows:
First Session (June 1 to July 2, 2015)
Withdrawal on or before June 2 - 100% Refund
Withdrawal after June 2 - No Refund

Second Session (July 7 to August 7, 2015)
Withdrawal on or before July 8 - 100% Refund
Withdrawal after July 8 - No Refund

Online Session (June 1 to August 7 2015)
Withdrawal on or before June 2 - 100% Refund
Withdrawal after June 2 - No Refund

COURSE INFORMATION

Course Load: A student may schedule no more than two courses per Summer Session.

Transfer of Credits: Each course is considered to be 4 credits for transfer purposes. Transcripts reflecting grades for all summer sessions will be available the week of August 17. Transcripts may be requested by completing a transcript request form at the Registrar’s Office or by writing to the Registrar’s Office.

HOUSING AND MEALS

Campus housing and meals are available to current Albright students; they are not available for non-Albright students.

Students interested in campus housing and meal plans should contact the Office of Housing and Residential Life at (610) 921-7641.

COURSE INFORMATION

Course Load: A student may schedule no more than two courses per Summer Session

Transfer of Credits: Each course is considered to be 4 credits for transfer purposes. Transcripts reflecting grades for all summer sessions will be available the week of August 16. Transcripts may be requested by completing a transcript request form at the Registrar's Office or by writing to the Registrar's Office.

Quality/Non-Quality: Albright degree students may take certain courses on a Quality/Non-Quality basis. This summer is considered part of the 2014-15 Academic Year for Q/NQ election purposes. This option is not available to non-degree and visiting students.

COLLEGE OPPORTUNITY PROGRAM

The College Opportunity Program is designed to offer a college learning experience to high school students. Students in the program may take one or two Summer Sessions courses. High school students who have completed their sophomore year are eligible to participate in the program. Such students must have the written approval of their guidance counselor or other school official. Students who will graduate from high school this year also are eligible to participate. The special tuition for this program is $880 per course (50% of the regular tuition rate). NOTE: We are unable to offer campus housing for College Opportunity students.

Albright College is committed to a policy of equal opportunity and does not discriminate on the basis of race, religion, age, national origin, sexual orientation, veteran status, marital status, or disability. This policy extends to all educational, service, and employment programs of the College.

COURSE DESCRIPTIONS

BUSINESS

BUS210 Production Management An introduction to concepts, principles, and practices of effective creation and distribution of goods and services. The focus of the course is on quantitative techniques for problem solving and decision making in a variety of strategic and tactical areas of operations management, including total quality management, forecasting, product design, process design and capacity planning, location planning, supply chain management, inventory control, and project management. Prerequisite: ECO207 Statistics.

ECONOMICS

ECO207 Statistical Analysis for Economics and Business An introduction to the concepts, theories, and methods of statistical problem-solving in business and economics. Topics include frequency distributions, descriptive statistics, elementary probability and sampling theory, probability distributions, elementary hypothesis testing, analysis of variance, correlation, and regression.

ECO301 International Economics & Finance A study of international economics and finance. Topics include survey of the major theories of international trade, the theory of tariffs and other barriers to trade, foreign exchange systems and markets, international money and capital markets, and international banking. Special attention will be paid to these topics as the framework within which the financial managers of multinational corporations operate. Prerequisite: Economic Principles.

ECO336 Intermediate Macroeconomic Analysis An examination of the modern history of determination of the level and rate of growth of income, employment, output, and general price level. Alternative fiscal and monetary policies to facilitate full employment and stable economic growth. Prerequisite: Economic Principles.
ENGLISH

ENG135A American Short Fiction This course will examine American short fiction of the nineteenth and twentieth centuries. Not an historical survey, it will investigate some of the more significant aspects of what has been called “the most distinctively American literary genre.” Readings will be drawn from the works of writers such as Irving, Hawthorne, Poe, Melville, James Crane, Anderson, Fitzgerald, Faulkner, Hemingway, O’Hara, Welty, O’Connor, Barth, Bethelme, and Oates. The last part of the course will emphasize the ways in which some recent American short fiction contrasts markedly with earlier work.

ENG135B Hitchcock in Literature and Film The class will read selected works of fiction Hitchcock used as the basis for his films and study the relationship of written text to cinema. We will also explore the “grammar” and style of narrative cinema in general focusing upon their use by one of the most literate and visually sophisticated directors of all time. Most of our in-class time will be spent looking at key Hitchcock films followed by discussion and analysis.

MATH

MAT131 Calculus and Analytic Geometry I Fundamental concepts of functions of one variable: limits, continuity, and differentiability. Derivative applications in curve stretching, related rates, and maxima-minima problems. Introduction to indefinite and definite integration including the fundamental theorem. This is the first course taken by students in a math or math-related curriculum.

MAT132 Calculus and Analytic Geometry II Continuation of Calculus I. Topics include transcendental functions, applications of integration including volume, surface area, arc length and work. Also covered are integration techniques, indeterminate forms, improper integrals, sequences and series, and Taylor’s theorem. Prerequisite: Calculus I.

PHYSICS

PHY105 Topics In Physics with Lab This course is a conceptual physics lab science course designed to introduce the basic concepts and principles describing our physical world. Some of the topics covered are force and motion, energy, temperature and heat, waves and sound, light, electricity, magnetism, and atomic structure and the laws that govern their nature and behavior. With a good grasp of the concepts of physics, you will gain a better understanding and appreciation of our physical world. This course is for non-science majors.

GENERAL STUDIES FOUNDATIONS LAB SCIENCE or GENERAL STUDIES FOUNDATIONS-NATURAL SCIENCE

PSYCHOLOGY

PSY100 General Psychology This course introduces students to the broad discipline of psychology, focusing on theories and research explaining behavior. Major areas include, but are not limited to biopsychology, motivation, sensation, perception, learning, cognition, development, stress and health, personality, and psychopathology.

GENERAL STUDIES FOUNDATIONS-SOCIAL SCIENCE

RELIGIOUS STUDIES

REL231 Cults/New Religious Movements This course provides an opportunity for students to develop a general sociological understanding and perspective with which to evaluate, interpret and understand new religious movements, also known as “cults.” Topics investigated include the historical emergence of new religious movements, recruitment strategies and the use of violence. Several case studies are used throughout the course including: The People’s Temple, The Branch Davidians, Aum Shinrikyo, Montana Freemen, Solar Temple, Heaven’s Gate and Chen Tao.

GENERAL STUDIES CONNECTIONS-HUMANITIES

SOCIOLOGY

SOC101 Introduction to Sociology A general study emphasizing the concepts methodologies through which the sociologist investigates the nature of the social structure and the social processes related to individual behavior.

GENERAL STUDIES FOUNDATIONS-SOCIAL SCIENCE

SOC231 Cults/New Religious Movements This course provides an opportunity for students to develop a general sociological understanding and perspective with which to evaluate, interpret and understand new religious movements, also known as “cults.” Topics investigated include the historical emergence of new religious movements, recruitment strategies and the use of violence. Several case studies are used throughout the course including: The People’s Temple, The Branch Davidians, Aum Shinrikyo, Montana Freemen, Solar Temple, Heaven’s Gate and Chen Tao.
