INNOVATIVE COURSES

The Accelerated DSP offers courses from Albright's traditional curriculum as well as courses designed specifically for the DSP student and format. Most students begin with English Composition, and move from there into explorations of philosophy, history, and other engaging classes in the humanities.

Delve into psychology, political science, and other areas of the social sciences. Courses in music, theater, computer graphics, and art will help you to expand your knowledge of and appreciation for the arts. In these times of global business and world culture, our courses in foreign languages and cultures will help you see beyond your current borders.

From controversies in nutrition to science in the modern world, our natural science courses will help you connect the laboratory with your everyday life. Math, computer science, statistics, and other quantitative courses help you sharpen your real-world skills. Interdisciplinary courses show you the connections that help transform your education from a selection of courses to a meaningful picture.

Here are just a few of the innovative course offerings in the Accelerated Degree START Program:

- Psychology 206 The Social Psychology of Gender and Gendered Communication
- Special Interest 239 Science in the Modern World
- French 208 French and American Cultural Values
- Anthropology 206 Food and Culture
- Philosophy 150 Legal Reasoning
- Special Interest 283 Language Variation in the United States
- Religious Studies 151 Judaism, Christianity, Islam
- Special Interest 206 Nutrition Concepts and Controversies
