At Albright you’ll come to a different way of thinking about a college education.

You’ll find connections where others see differences, and uncover relationships where others see ideas standing alone.

You’ll discover that science can sometimes be poetic, like the graceful migration of whales, or that a sonnet can be as precise as a mathematical equation.

You’ll understand history by putting on a play, and learn to speak the language of digital media. You’ll reach across boundaries, fields of study, languages and cultures.

Albright is a place where opposites come together, where education occurs inside and outside the classroom, and professors are both your teachers and your friends.

At Albright, you’ll come to a different way of thinking about yourself.

You’ll go off on a journey that may change your destiny, and take “the road less traveled” because life rarely travels in a straight line.

You’ll gain the flexibility you need to build a truly successful future, and embark on a different way of living.
On the one hand, the Albright academic program will give you a classic liberal arts education, with traditional majors and an emphasis on the acquisition of critical thinking skills.

But at Albright, you’ll find something more. In addition, you’ll encounter a different way of thinking and create a unique path tailored to your own skills and interests. You’ll study an interdisciplinary curriculum that reflects real life instead of compartmentalized ideas. Along the way, you’ll draw connections between fields of learning and discover the many ways of thinking and knowing. You’ll graduate with a strong foundation in your major(s) and a breadth of knowledge that can only come from study across the boundaries of individual fields of study.

**Definitions**

**Discipline:** a single field of study.

**Interdisciplinary:** involving two or more fields of study.

**Boundaries:** limits, barriers to your personal, intellectual and social growth.

**Crossing boundaries:** opportunities to explore life’s options. A way of life at Albright.

At Albright, you can easily take a single interdisciplinary major (such as psychobiology or crime & justice), combine different fields of study into a dual major, or create an individualized major that will expose you to a whole new world of experiences, learning styles and subject matters.
of thinking about knowledge
Leading the Way

- Albright has offered interdisciplinary programs for more than 40 years.
- Current students have created over 200 different combinations of majors.
- Nearly 50 percent of our students have interdisciplinary or combined majors.
- We created the first undergraduate psychobiology program in the nation.
- We developed the first undergraduate biochemistry program in the region.
- Our Environmental Studies program was among the first of its kind.

"Albright has given me the courage to believe that I can accomplish anything I set my mind to. For example, I worked in an elementary school in the Hispanic community for my service learning class, tutoring Spanish-speaking fourth graders. An Albright education gives you the confidence to achieve anything, which leaves you feeling secure and safe about your future."

Undecided about a Major?

Albright's unique Alpha Program may be your first step into an interdisciplinary experience. Designed for those who haven't yet decided what major or career direction to follow, the Alpha Program is all about exploring yourself. With the aid of a knowledgeable and encouraging faculty advisor, you'll weigh your interests, define your academic possibilities and consider career choices. You'll also benefit from special programs designed by the Career Development Center. When the time comes to declare a major (or majors), you'll make a truly informed decision.

"The Alpha Program really came through for me. With my advisor's help, I put together a diverse academic program that gave me a broad background and a push in the right direction. I gained a liberal arts foundation that I depend on every day in my business and in my life."  
Steve Topp  
President, Marchon Eyewear
A Different Kind of Classroom: How Albright Students Learn

- Volunteering weekly in the Hispanic community of Reading as part of a Spanish service learning class
- SLugging through the wetlands of the Hudson River to study the breeding of marsh fish
- Writing and producing an original play to better understand a historical text
- Attending a New York advertising conference for a firsthand look at how marketing works
- Taking a trip to the National Museum of Women in the Arts as part of Albright’s course, “Women in the Arts”
- Traveling to the Dominican Republic to hone your Spanish language skills on a service trip
- Mastering 3D animation in a state-of-the-art digital media lab
- Facilitating group therapy through an internship at a local counseling center
- Studying organic chemistry in England
- Presenting your research on sleep deprivation at a national psychology conference
- Creating a video documentary on UFOs, ESP, ghosts and supernatural experiences
- Securing an internship with an international business in Mexico

Some see a classroom as just a classroom. At Albright, we see a room full of possibilities, a place where connections are valued and relationships explored. Collaborative teaching and learning have been our hallmarks for more than 40 years. So what does this mean for you? It means you’ll be part of a learning community defined by dialogue and teamwork instead of lectures and solo assignments. Your course of study won’t be limited to four walls and a blackboard. Albright students cross learning boundaries in many ways: by participating in research opportunities and internships; taking part in conflict resolution simulations with the United States Institute of Peace (USIP); and going on field trips to places like New York City to explore the Metropolitan Museum of Art, or Hawaii to study the migration of humpback whales. Through these and numerous other opportunities, you will gain the kind of flexible wisdom only real experience can deliver.
The Experience
What does it mean to be human? Will Shakespeare’s Othello translate to film? What can you do with a major in philosophy? These are just a few of the questions addressed by The Experience, Albright’s one-of-a-kind special events program. Think of it as the perfect extension of the curriculum, an opportunity to participate in the rich intellectual and cultural life of this campus. Through a calendar of high quality programs, you’ll attend lectures, plays, concerts and other events that, over time, range across every academic discipline. You’ll be exposed to a variety of cultures and points of view through art, music and media, and add yet another boundary-crossing experience to your Albright education.

Interim
What can you do in a month? You can visit the rain forest on Martinique, study the migration of humpback whales in Hawaii, explore the historic landing site of Columbus on the island of San Salvador in the Bahamas or learn about the major forms of the Indian Mother Goddesses on a tour of India. All of these excursions—and more—are made possible by Albright’s faculty, who engineer off-campus study experiences for their students during Albright’s Interim/January term.

Guest Speakers at Albright
Maya Angelou, best-selling author, poet, actress, educator and playwright
Oscar Arias, Nobel Peace Prize winner and former president of Costa Rica
John C. Bogle, senior chairman of the board and founder, The Vanguard Group, the world’s second largest mutual fund organization
Gloria Borger, assistant managing editor for U.S. News & World Report
Robert Britz, president & executive vice chairman of the board, The New York Stock Exchange
Rajmohan Gandhi, grandson of world-renowned Mahandas Gandhi
Jane Goodall, acclaimed conservationist and researcher of chimpanzees in the Tanzanian wild
Prakash Raj, journalist and UN human rights consultant
Philip A. Sharp, Nobel Laureate in Medicine
Huston Smith, author, professor and featured expert in a five-part PBS series on world religions
Peter Storey, distinguished professor of Christian ministry, Duke University, and former prison chaplain to Nelson Mandela

Crossing Real Boundaries: Off-Campus Study at Albright
• Washington Internship Program—learn in government agencies, private businesses and non-profit organizations in the heart of the capital.
• National Theater Institute—acting, playwriting, directing and more in an existing creative environment accredited by the Royal Shakespeare Company.
• The Marine Science Program—get an up-close view of marine life at Duke University’s Marine Laboratory in Beaufort, North Carolina, or tropical ecology at the Bermuda Station for Research.
Internships

Internships at Albright range across the curriculum, placing students in a wide variety of professional settings, including:

Bayer Corporation
Berk’s AIDS Health Network
Berk’s County Intermediate Unit
Autistic Support Classroom
Berk’s County Juvenile Detention Center
Berk’s County Public Defender’s Office
Bureau of Forensic Psychiatry
Canon Drug & Alcohol Rehab Centers
Center for Strategic Studies, Washington, D.C.
Dean Witter
The Environmental Protection Agency
Johnson & Johnson
Lucent Technology
Merck & Company
National Institutes of Health
Office of the Corporate Counsel, Washington, D.C.

Philadelphia Eagles Football Team
Reading Eagle (newspaper)
Reading Hospital & Medical Center
Reading Phillies Baseball Team
Reading Police Department
Salomon Smith Barney
The Senate Republican Policy Committee
United Nations Institute for Disarmament Research, Geneva, Switzerland
U.S. Attorney’s Office
U.S. Drug Enforcement Agency
U.S. Marshals Service
Walt Disney World
White House Office on the Environment
Wistar Institute for Human Gene Therapy

“Not only are my professors experts in their fields, but they also know exactly what each of us as students needs. Outside of class, professors quickly became personal friends. Like my advisor; he’s great to talk to and always supportive. I wanted to be a journalist, but was also passionate about studying a second language. So I designed a triple major in English, Communications and Spanish for myself! My advisor backed me up all the way, and even helped me find an invaluable internship at the Reading Eagle.”

Sheila M. Berninger
Sophomore
English, Communications and Spanish
A Different Way of Thinking about Technology

Exploration and discovery are what Albright is all about. That’s why we’ve made an impressive commitment to connecting you to cutting-edge technology and scientific instrumentation. Whether you’re majoring in new programs like digital media, conducting research on one of Albright’s two electronic magnetic spectrometers or searching the Internet for statistical data, you will explore the boundaries where learning and technology intersect.

Albright Academic Facilities

- **Digital Media Lab**—state-of-the-art multimedia studio with 14 Apple G4 workstations, two image scanners, color printing, three digital video workstations and digital audio/MIDI production.
- **Optical Physics Lab**—with lasers, fiber optics and photodetection technology like CCD cameras.
- **Menner-Pfeiffer Hall of Science**—two nuclear magnetic resonance spectrometers (each worth $500k and one reserved exclusively for student use), scanning and transmission electron microscopes, molecular genetics facilities, a microcomputer facility and much more.
- **Masters Hall of Humanities**—state-of-the-art language lab and teleconferencing facility.

- Albright is one of the first liberal arts colleges in the nation to begin offering courses in wireless handheld devices.
- Albright’s digital media program will help you become fluent in web design, digital video production, streaming media, virtual communities, digital art, CD-ROM/DVD-ROM, PDAs and more.
- Albright is the only college where students may be certified as official Palm technicians.
- Albright’s optical physics major is the only such program nationwide at a small college.
There's something unusual about the Albright faculty. Many have earned degrees from the most prestigious institutions in the country, such as MIT, Harvard, Yale, Penn, Stanford and Cornell. Many are scholars and noted researchers, earning grants from such august organizations as the National Science Foundation, publishing articles with the Oxford University Press and providing sound bites for National Public Radio. Yet, despite their pedigree, they are among the most down-to-earth people you'll meet at Albright. And you'll do more than just meet them.

The Albright faculty are famous for their dedication to students. They'll encourage you to explore new worlds of knowledge and experience. As advisors, they will help you create an individualized education and major, and graduate on schedule. As collaborators, they will work side-by-side with you on research projects and special learning opportunities. And as friends, they will be there for you. You'll run into them nearly everywhere you go on this campus, at football games and Experience events...and don't be surprised if you see them performing in the choir or in a Domino Players production. Like everything else at Albright, our faculty are multifaceted.

Albright's Innovative Faculty
What do we look for when hiring new Albright faculty members? According to President Henry A. Ziman, "Energy, flexibility, creative thinking...scholars whose interests cross the boundaries of individual disciplines...and connect on a personal level."

A different kind of teacher: the
Student/Faculty Research at Albright

Albright’s Summer Collaborative Undergraduate Research Program will enable you to collaborate with faculty on 10 weeks of professional-level research projects ranging from the humanities and arts, to the social sciences and natural sciences. Titles of recent research projects include:

- Measuring Superluminal Light through a Tunneling Barrier
- The Effects of Incorporation: The Pull of Federalism and the Bill of Rights
- A Fluorescence Study of DNA/Protein Binding
- Chinese Lessons: Learning about Self and the Other by American Women in Republican China, 1920–1948
- Prevalence of Obstructive Sleep Apnea in Reading Hospital Patients
- Firearm Availability and Regional Suicide Rates
- Architecture and the Religious and Civic Piety of Early Congregational Churches
- The Effect of Adolescent Perceptions of Parental Religious Orientation on Adolescent Religiousness
- Computer Applications to High School Chemistry
- Testing Executive Function and Cognitive Complexity in Children
- Effects of Invasive Marsh Plants on Breeding Success of Fish Species

"The biggest advantage of the Alpha Program [for students who are undecided about a major] is the advising. Your advisor becomes your link to the school. [Professor] Betsy Kiddy is my Alpha advisor, and she is the person I go to when I need advice on which classes to take or just need an adult to talk to. She’s been very helpful and insightful, and she has encouraged me to explore different fields. Her encouragement led me to take digital media and physics classes, both of which I enjoy and plan to major in. She also put me in touch with professors in different disciplines to answer questions she could not.”

Darren Stoltzfus, Freshman, Physics and Digital Media
A bright is a way of life, not just a course of study. Our community includes everyone who comes to this campus—students, faculty, administrators, staff and even visitors. All of them, no matter how long they are here, say there’s something special about this place. You’ll live and study with enthusiastic, down-to-earth students and faculty who embrace people of diverse strengths, socioeconomic backgrounds, opinions and racial and ethnic heritages. You’ll make the kind of friends who will mean something to you for the rest of your life.

Allbright Experience Events in a Recent Year:

- 5 student art events
- 4 Freedman Gallery exhibitions
- 20 theatre events
- 36 public lectures
- 38 concerts
- 9 films
- 5 bus trips to museums, aquariums, etc.
- 2 poetry readings
- 6 dinners
- 6 dance performances
- 1 Capoeira event (Brazilian martial art form)

A total of 132 Experience events

Allbright students are from 27 states and 20 countries.

With students of color making up 20 percent of the student body (15 percent from the U.S. and 5 percent international), diversity at Albright is outstanding compared to other small, liberal arts colleges.

Because of its inclusive, diverse campus community, Albright was named as one of the "100 Best Colleges for African-American Students."
A Different Kind of Fun

With more than 80 student-run clubs and organizations, you’ll uncover a world of opportunities for leadership, friendships and fun at Albright. You’ll have a rich, active campus life and find many ways to get involved, such as:

- Playing the lead in the Domino Players production of the comedy A Funny Thing Happened on the Way to the Forum
- Becoming a student representative to the Albright College Board of Trustees and having an impact on the life of this campus
- Performing at Reading’s Sovereign Center with Kenny Rogers and the Albright Concert Choir, or with Barry Manilow and Albright’s Gospel Choir
- Earning MAC All-Conference First Team honors on Albright’s football team
- Taking an easy trip to Baltimore to see the Orioles play in Camden Yards, or to the Big Apple to see a Broadway play
- Heading to Reading’s Blue Marsh Recreational & Ski Area or the Poconos Mountains (only 45 minutes away) for mountain biking, hiking or skiing
- Shooting your best game in a Cosmic Pool Tournament, laughing with comedian Billy Burr or beating the house at Casino Night
- Crossing cultural boundaries at the Latino Heritage Party

Albright competes in the Middle Atlantic Conference, one of the nation’s strongest NCAA Division III conferences. In our 22 intercollegiate men’s and women’s sports you’ll encounter heart-pounding competition. At the same time, you’ll be part of a sports program that emphasizes the whole college experience. Albright athletes are among some of the best students on campus, excelling on our playing fields and in our classrooms. Athletic excellence, academic achievement and personal growth form the backbone of a sports program in which you’ll become a champion in the fullest sense of the word.

Albright Athletic Triumph

• Albright’s women’s swim team has been MAC champions for four years running. Their 58 dual meet wins is the longest running winning streak of any athletic team in Albright’s history.

Albright Athletic Facilities

• Bollman Center—2,000-seat events center and one of the finest facilities in Division III athletics with remodeled fitness center that now includes a variety of cardiovascular machines, Streamlined Selectorized and free-weight equipment, Iron Grig dumbbells and two tons of free weights.

• LifeSports Center—indoor recreational and practice facility that features four indoor basketball courts; four racquetball courts; a one-tenth-mile track; accommodations for indoor tennis, badminton and volleyball; and baseball and softball batting cages.

• Natatorium—25-yard, six-lane pool.
A different kind of city

Albright's location in Reading, Pennsylvania, provides you with a lovely, suburban campus setting next to a colorful mid-sized American city and metropolitan area. A prime location for internships, Reading will also give you access to a fine public museum, great jazz, the 9,000-seat Sovereign Center (concert venue and home of Reading Royals ice hockey), the newly renovated Performing Arts Center and a number of cosmopolitan restaurants ranging from French to Cuban to Indian. Reading also offers amazing outlet shopping and easy proximity to Philadelphia, New York, Baltimore and Washington, D.C.

Albright Club Sports
- Deck Hockey
- Lacrosse Club (men's & women's)
- Rugby (men's & women's)

Albright Intramural Sports
- Basketball
- Bowling
- Football (touch)
- Racquetball
- Softball
- Ultimate Frisbee®
- Volleyball
- Waterpolo

To Do in Reading

Cultural
- Berks Jazz Fest
- Central PA African-American Museum
- Reading Public Museum & Planetarium
- Reading Symphony Orchestra
- Sovereign Center
- Sovereign Performing Arts Center

Sports & Recreation
- Reading Phillies Baseball, AA Affiliate—Philadelphia Phillies
- Reading Royals Ice Hockey, AA Affiliate--LA Kings (NHL) / Manchester Monarchs (AHL)
- Reading Rage Soccer, D3 pro league
- Maple Grove Raceway, National Hot Rod Association race track
- Hawk Mountain Sanctuary, hiking and migratory bird watching (nearly 20,000 hawks, eagles and falcons)
- Blue Marsh Lake Recreational Area, hiking, biking, horseback riding, swimming, boating and water sports
- Blue Marsh Ski Area, skiing, snowboarding and tubing
A different way of thinking

What do Albright graduates become? In a word, successful. They are entrepreneurs, research scientists, physicians, diplomats, actors, legislators, fashion designers, lawyers, publishers and CEOs. In fact, there may be no better preparation for today’s complex, rapidly changing world than the kind of interdisciplinary education that Albright specializes in. Albright turns out graduates with alert, intellectually flexible minds who see the world as a web of interconnected people, ideas and events. They are articulate, adaptable, open to change and able to work in teams. They communicate effectively and synthesize varied information. Join them and you’ll be ready to pursue any number of professional directions and to cross boundaries for the rest of your life. You’ll see unlimited possibilities where others see limitations, unique solutions where others see problems. You’ll create your own definition of success.

Measures of Success

- Each year, over 25 percent of graduates enroll in graduate school, and another 20 percent apply to professional schools. Albright’s acceptance rate is impressive: 85 percent to veterinary school, 90 percent to medical school, and 80 percent to other professional programs.

- Ninety-two percent of graduates of Albright’s teaching certification program pass state qualifying exams on their first attempt.

A Sampling of Employers of Recent Albright Graduates

Notable Albright Alumni

Instead of highlighting older graduates at the peak of their careers, we want to give you an interesting cross-section of graduates from the 1980s and 1990s:

- Dr. Jacqueline S. Fetrow ‘82, professor of computational physics, Wake Forest University, recipient of research grants from the National Institutes of Health, National Science Foundation and the American Chemical Society
- Dr. Robert Buck ‘82, senior technology consultant, DuPont Chemical Solutions Enterprise
- Jeff Lentz ’85, actor & singer, major roles with the New York City Opera, Phantom of the Opera (Toronto) and PBS’s Great Performances.
- Charles H. Dean III ’85, vice president of technology, CVS Pharmacies
- Monica DiNatale Eureycke ’89, senior graphic artist, CBS News
- Lauren Ashburn ’89, correspondent and morning anchor, USA Today
- Stanislaw Chmowicki ‘90, assistant sports editor, New York Daily News
- Laura Torrado, Esq. ’90, managing director, Bear Stearns
- Kimberly Hill Garver ’92, special agent, FBI
- Daniel Frank ’92, engineering manager, Arrow International Inc.’s Cardiac Assist Division
- Scott Hunsicker ’92, assistant general manager, Reading Phillies AA baseball team
- Todd Quinones ’96, reporter, KYW-7TV, Eyewitness News, Philadelphia
- Jason Frame ’98, network security-IT specialist, IBM Global Services Corps
- Kim Field ’99, director of development for student affairs, Florida State University
- Lauren Ashburn ’89, correspondent and morning anchor, USA Today
- Stanislaw Chmowicki ‘90, assistant sports editor, New York Daily News
- Laura Torrado, Esq. ’90, managing director, Bear Stearns
- Kimberly Hill Garver ’92, special agent, FBI
- Daniel Frank ’92, engineering manager, Arrow International Inc.’s Cardiac Assist Division
- Scott Hunsicker ’92, assistant general manager, Reading Phillies AA baseball team
- Todd Quinones ’96, reporter, KYW-7TV, Eyewitness News, Philadelphia
- Jason Frame ’98, network security-IT specialist, IBM Global Services Corps

- University of Pittsburgh
- University of Southern California
- University of Virginia
- Villanova University
- Wake Forest University
- Yale University

“I really appreciated the small-sized labs and the hands-on experience I was able to receive at Albright. I developed a close relationship with my professors, and because of this, they knew what I was looking for and helped me get my job with the Fox Chase Cancer Center.”

Melinda M. Vaughton ’92, Scientific Technician, Fox Chase Cancer Center
Admission
Albright College is committed to developing each student’s talent, ambition, values and experience to the fullest. In considering prospective students, we look for people who will thrive in a close-knit, academically challenging community of learners. To that end, we strongly encourage you to give a detailed picture of yourself and what you’ve accomplished when applying for admission to Albright.

To be considered for freshmen admission, please submit the following:

- The Albright application and essay/graded paper (we also accept the Common Application)
- Your high school transcript (including senior grades or classes in progress)
- The Secondary School Report form (completed by your guidance counselor)
- Recommendation from at least one teacher
- Standardized test scores from either the SAT or the American College Test (ACT)

Transfer applicants should contact the admission office for a transfer application.

DON’T FORGET You can find out much more about Albright and apply online at:

www.albright.edu

The $25 application fee will be waived if you apply to Albright online.

Is Albright Affordable?
Yes, Albright believes that students should make their enrollment decisions based on the quality of our academic and extracurricular opportunities, and on the warmth and friendliness of the Albright College community. The decision should not be based on finances. To make that possible, we offer numerous merit scholarships and awards in addition to generous need-based financial aid awards. We are pledged to help make Albright affordable. For full details about our scholarships, awards and financial aid policies and exceptions, please go to our website at www.albright.edu or request our Scholarships, Awards & Financial Aid brochure by calling (800) 252-1856.
A Different Kind of College

The only way to make the right decision about attending Albright is to cross a few boundaries and see us for yourself—take a walk on campus, get to know the neighborhood, visit with our students, sit in on a class or two. You’ll have many opportunities to visit the campus throughout the year and we strongly encourage you to attend one of our open houses. Although not required, an interview with a member of our admission staff is recommended and will go a long way toward answering some of your most important questions. If you are a junior or a senior in high school and wish to schedule an interview and tour of campus, please call the Admission Office at least two weeks before the date you’d like to visit. We want to meet you!

Virtual Albright
You can see what Albright is all about without even leaving your living room. Visit our website, take an online tour and get answers to many of your questions at:
