

BUSINESS ADMINISTRATION – MANAGEMENT TRACK

What is Management?

“Management is the organizational process that includes strategic planning, setting objectives, managing resources, deploying the human and financial assets needed to achieve objectives, and measuring results. Management also includes recording and storing facts and information for later use or for others within the organization. Management functions are not limited to managers and supervisors. Every member of the organization has some management and reporting functions as part of their job.” <http://home.earthlink.net/~ddstuhlman/defin1.htm>

Learn more about management and business and financial operations occupations by going to <http://www.bls.gov> and by visiting the links listed below.

How do you get ready? Management is a broad business degree that can lead to many career opportunities. Students should clearly define their career goals and seek related experiences to reach those goals.

- Gaining experience through part-time and summer jobs or internships is critical.
- Many desirable skills can be developed through participation in and leadership of student organizations.
- Develop and utilize a personal network of contacts. Once in a position, find a mentor.
- Consider earning an MBA after gaining work experience to reach the highest levels of business management.
- Learn to work well in a team and effectively with a wide variety of people.
- Strong communication skills, including public speaking, are important to achieving success in this field.

Related Major Skills
