

Tier 0 Connect Blu-ray to Projector

- 1) Turn on the projector by pushing the power button on the projector remote control. Wait for the projector to finish its start-up process.
- 2) Change the input channel on the Extron switch by pushing the button for the Blu-ray Player. This is often set to 4, but follow the instructions on the label at the switch if there is one.

Input channel buttons

- 3) Turn on the Blu-ray player using the "Power" button on the player or on the Blu-ray remote control.

Power and Open/Close

- 4) If you do not see the Blu-ray player on the projection screen right away, press the 'HDMI' input button. If the projector's input channel was changed, this will switch it back to the HDMI channel being used by the Blu-ray player.

- 5) Use the "Open/Close" or "Eject" button on the Blu-ray Player or the Blu-ray remote control to open the tray and insert your disc.

- 6) Navigate the disc menu and control the playback by using the Blu-ray remote control.

- 7) Audio from the Blu-ray player will transfer over the HDMI cable. To adjust the speaker volume, use the Califone speaker remote control.

- 8) Be sure to turn off the projector when you are done.
